

# WEATHER BALLOON RESEARCH

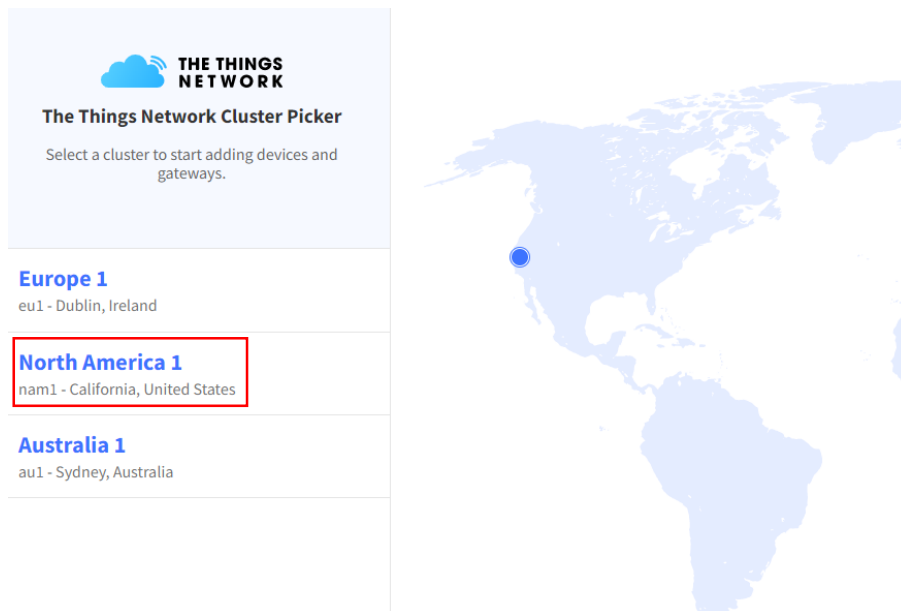

Adding Tektelic Gateway to The Things Network

Junhyung Park  
C25junhyung.park@afacademy.af.edu, junhyung1821@gmail.com

1. Create The Things Network account from <https://account.thethingsnetwork.org/register>
2. Login from <https://eu1.cloud.thethings.network/oauth/login>
3. Click “Go to the Console”

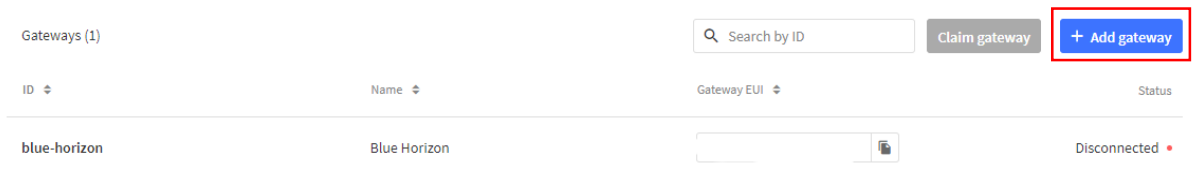

4. North America server will be used. Click “North America 1.”

5. A gateway will be added to The Things Network in this tutorial. Click “Go to gateways” from this console.

6. Click “Add gateway”

7. Add necessary information

Gateway ID <sup>\*</sup>

my-new-gateway

Gateway EUI

Gateway EUI

\*\*\*Gateway EUI can be found here:

## LoRaWAN options

Frequency plan  \*

United States 902-928 MHz, FSB 2 (used by TTN) | 

8. Create the gateway

Create gateway
